6T DIESEL WINCH

For Cable Hauling and Recovery

This 6 Tonne Diesel Winch is designed for general cable hauling projects and is commonly used for conveyor & pipe installations. Features include hydraulic loading holding valves and fail safe brakes enabling them to be safely used for hoisting. It is packed with features including variable line speed with high speed selection for fast retrieval and payout.

Comes complete with an operator's enclosure and operator's seat as well as night work lights. The skid-mounts are fitted with container locks in standard 20 foot configuration. The skid is provided with lift points at each corner and cross tubes for lifting with a forklift. The 6 Tonne Diesel Winch may be truck mounted or anchored on solid level ground.

Standard Features

- Fitted with 1000m (24mm) braided rope (wire also available)
- Kubota diesel motor
- Programmable display screen with data logger
- Constant tension settings 2 Tonne (20kN) to 6 Tonne (60kN)
